TOOL STORAGE

DUAL ROLL CAGE CONSTRUCTION

- Two Cages instead of the 3 in PLATINUM™
- No "Double Wall" used in ARCA™
- Slide piercings are direct into Roll Cage
- Roll Cage construction helps keep the box square from the beginning of the manufacturing process, and creates the most durable box possible. **We are the only Manufacturer that uses Roll Cage Construction**

ACCURIDE SLIDES (230lb. Rating)

- Top of the line slides sourced in North America
- Integrated TLC+ into the Slides (Patented by Cornwell)
- Double Slides on Wide Bank Drawers only
- More Ball Bearings
- Operates smoothly under a load and reduces drawer droop when the drawer is at full extension. Latching works well even if the box is on an uneven floor

LOCK MECHANISM

- Mounted to the Roll Cage like PLATINUM™. Not Mounted to the back wall like PRO SERIES®
- Roll Cage mounted locking system is not influenced by warping or oil canning of the back wall. Drawers lock consistently.
- Key lock can be upgraded to an Electronic Lock in the field

6" x 2" CASTERS

- Glass Reinforced Casters
- More durable, lasts longer, and they are better for the environment

EXCLUSIVE PAINT FORMULATIONS

- Textured Mid-Gloss Finish
- Unique formulation that contains metal flake and interference pigments not seen in our industry before
- Easy to clean up - stands up to dirt, grease and finger prints

ARCA™ 57" 8-Drawer Double Bank Roller Cabinet in Ignition Orange
